When construction has commenced without a permit, the permit fee shall be twice the original amount to cover the additional inspections and the time necessary to insure compliance with the code. When construction has begun under the authorization of a permit, but the permit holder has failed to obtain the required inspection, and the construction has passed the stage in which the inspection can be reasonably done, then an additional 25% of the original permit fee (\$25 minimum) will be charged. A \$200 deposit will be required on all residential permits and a \$500 deposit will be required on all commercial construction permits with estimated construction costs greater than \$2,500. This deposit shall be refunded after final inspection has been approved under a valid and current permit and the Public Works Department has approved all work and the condition of the right-of-way. Should the permit expire or final inspection not be obtained and approved within this time frame, the deposit will be forfeited.
